Education

KTH Royal Institute of Technology **Aug. 2024 – June 2029 (Expected)**
M.Sc. in Computer Science and Engineering (300 ECTS) *Stockholm, Sweden*

- **Intended Specialization:** Machine Learning
- **Computer Science:** Algorithms, Data Structures and Complexity, Operating Systems, Database Technology, Computer Organization and Components, Programming Paradigms, Logic for CS
- **Mathematics:** Probability Theory and Statistics for ML, Calculus in Several Variables, Numerical Methods, Linear Algebra, Discrete Mathematics

Technical Skills

Languages: Python, Java, C#, C, SQL, Go, HTML/CSS, JavaScript
Developer Tools: Git, GitHub, Linux, Unity Engine, SQLite, Docker, VS Code
Technologies & Concepts: Machine Learning, LLM Integration, Database Architecture, Agile Development, REST APIs, OOP, Game Networking (NGO), Web Scraping, .NET
Spoken Languages: Swedish (Native), English (Fluent), Spanish (Basic)

Projects

AI Engineer (Project Course) | *Python, SQLite, LLM APIs, Quantera AI* **Spring 2026**

- Architected a two-stage indexing pipeline to extract and analyze unstructured financial data in a team of eight.
- Reduced API processing costs through context filtering in SQLite and dynamic routing across tiered LLMs.

Commercial Indie 3D Game (Steam Launch 2027) | *Unity, C#, Unity NGO* **2023 – Present**

- Developing a commercial 3D multiplayer game targeting release on Steam in 2027.
- Implemented movement mechanics, physics interactions, and multiplayer networking via Unity Netcode.

Apex Desktop - PC Optimizer & Utility | *C#, .NET, WinUI 3, Win32 APIs* **2026 – Present**

- Developed an open-source native Windows 11 PC optimizer utilizing Win32 APIs and P/Invoke for performance, organization, and data management & monitoring.
- Implemented asynchronous local media compression pipelines and real-time hardware telemetry tracking.

Collaborative Fitness Application | *Python, OpenAI API, SQL, Git* **2024**

- Engineered backend API integrations using OpenAI models to generate personalized workout recommendations.
- Designed and implemented the relational database layer in SQL to store and manage user activity records.

Open Source Automation Suite | *Python, APIs, Git* **2024 – Present**

- Built automated data scrapers and market monitoring tools interacting with third-party web endpoints.
- Contributed bug fixes, documentation, and pull requests to open-source codebases on GitHub.

Experience

Studybuddy AB **Aug. 2023 – Present**
Mathematics and STEM Tutor *Stockholm, Sweden*

- Entering fourth consecutive year tutoring secondary students in advanced mathematics and science.
- Tailored structured learning plans to explain complex technical concepts and improve problem-solving skills.

Molinos DD **July 2022**
Market and Financial Analyst Intern *Zamora, Spain*

- Analyzed three years of financial data and market trends to support cost reduction and operational planning.

Scania AB **April 2019**
Software Development and Design Intern *Södertälje, Sweden*

- Contributed to front-end development workflows and conducted competitive analysis of digital platforms.
